I. MISIÓN

II. VISIÓN

III. OBJETIVOS

I. Mission

Contribute to the development of the energy sector through the creation of wind and solar projects, in accordance with regulations and international standards of good practices and criteria (ESG), environmental, social and corporate governance, which promote the transition towards a world with zero net emissions.

II. Vision

To consolidate itself as a leading and benchmark company in the development of renewable electricity generation projects with international quality standards, as well as the main promoter of the best business schemes in the energy sector.

III. Objectives

- Carry out all kinds of industrial activities within the framework of renewable energy, such as wind and solar power, as well as the development of electricity generation and energy storage projects.
- Manage and obtain the general or specific permits that the authorities require for the development of solar and wind farms.
- Acquire the necessary technology for the development of electricity generation projects, as well as the constitution of companies that are linked in the market.
- Contribute to economic growth and regional progress in areas conducive to the development of wind and solar projects.
- Respect the regulations on energy matters and participate in legislative discussion forums whose purpose is to improve the conditions of the public and private energy sector.
